HARDWOOD TABLE

HARDWOOD LEAF

FIBREBOARD LEAF

Øya dining table is designed to hold up to four leaves. The dining table comes with a centered-support leg. Please use the support leg from 2 leaves and up.

Øya is an extendable dining table that was only made for one client, a true "one of a kind" product. Sigurd Resell graduated from National Academy of Craft and Art Industry in 1947. He designed Øya while being employed at Rastad & Relling Tegnekontor in Oslo. What characterizes Resell's design are the defined logical constructions where form is decided by function. The elegant elliptical shape of the tabletop is both classical and modern, with legs that strengthen this feeling with an oval to round shape. We are proud to have this unique and beautiful table as part of the Eikund collection.

Designed in 1956.
